Jonas Salk
(October 28, 1914-June 23, 1995)

Today, the 28th of October is the 100th birthday of Jonas Salk, an American medical researcher and virologist, who discovered the Polio vaccine.

He forfeited 7 billion dollars by refusing to patent the vaccine, so that it would be available world over at an affordable price for Polio eradication.

Today India is polio free and we should remember him and his great gift to humanity.
